

# Four Tesla Models Approved From India's Testing Agencies

It was not immediately clear which models or variants these were but multiple test cars of Tesla have been spotted regularly on Indian roads. Tesla Model 3 and Model Y have been spotted on the Indian roads, signalling that these might be the cars to be launched soon. The approval for the four cars was published on the Vahan Sewa platform under the Homologation section.

According to the public listing, Tesla had applied approval for a total of four cars or variants and all of them were approved. The listing has not mentioned the name of the models or cars that have been approved.
