

Realme C21Y Launch In India Set For Today : Specifications, Expected Price

Realme C21Y launch in India: Smartphone brand Realme is all set to launch the latest budget smartphone under its C-series in India. The virtual-only launch event will begin at 12:30 PM IST. The highlight of the new Realme-C series phone is its big battery and triple rear camera setup. It features a water drop-style display notch. Other highlights of the Realme C21Y include up to 4GB of RAM, octa-core SoC, and a 5,000mAh battery with reverse charging support.

Realme C21Y specifications

The dual-SIM (Nano) Realme C21Y runs on Android 10 with Realme UI on top. It features a 6.5-inch HD+ (720×1,600 pixels) display with a 20:9 aspect ratio. Powering the phone is an entry-level octa-core Unisoc T610 processor paired with a Mali-G52 GPU and up to 4GB RAM. The storage can further be expanded via a dedicated microSD card slot. For biometrics, it gets a rear-mounted fingerprint scanner.

The phone is powered by an octa-core Unisoc T610 SoC, coupled with Mali-G52 GPU and up to 4GB of RAM. For photos and videos, you're getting a triple rear camera setup that houses a 13-megapixel primary sensor, along with a 2-megapixel monochrome sensor and a 2-megapixel macro shooter. There is also a 5-megapixel selfie camera sensor at the front.

The handset packs a 5,000mAh battery and supports reverse wired charging. Connectivity options on the phone include—LTE, Wi-Fi, Bluetooth v5, GPS, micro-USB port, and a 3.5mm audio jack. The smartphone also comes in two distinct colour

options Vietnam in Black Caro and Caramel Green colours to choose from.

Realme C21Y price in India (expected)

Realme C21Y price in India is yet to be officially revealed. The smartphone is expected to be available with a price tag similar to what was announced in Vietnam last month. Realme C21Y was launched at VND 3,240,000 (roughly Rs. 10,600) for the 3GB + 32GB storage variant. It also comes in a 4GB + 64GB storage option that is priced at VND 3,710,000 (roughly Rs. 12,100). We expect the phone's pricing in India to likely fall in the same range.
