

# GoPro HERO9 Black is featured with 5K video capabilities

GoPro launches its next-gen action camera. The new GoPro HERO9 Black has a new sensor for 5K videos, 20MP photos, and HyperSmooth 3.0 video stabilization at Rs 49,500 and available from late October in India.

HERO9 Black is best for the customers whose product is more valuable for their money. HERO9 Black reduced plastic usage as possible. The company introduced HERO9 Black as a high-value travel case instead of traditional wasteful packaging. Nicholas Woodman, GoPro's founder, and CEO also said that they were doing the same with the rest of their cameras by the end of 2021.

The HERO9 Black has a new front-facing 1.4-inch display, large 2.27-inch rear-display features with a longer battery backup. The Max Lens Mod Accessory is available for Max HyperSmooth and Ultra Wide-Angle Max SuperView to HERO9 Black. Other features like 1080p live streaming and webcam mode, timeWarp 3.0 with Real Speed and Half Speed, and HyperSmooth 3.0 with in-camera horizon leveling are available on the camera.

There is onboard Power such as HindSight, LiveBurst, Scheduled Capture and Duration Capture, and fine compatibility with Light Mod, Display Mod, and Media Mod for HERO9 Black.

The new features Max Lens Mod at Rs 10,500 will bring ultra-wide Max SuperView to HERO9 Black with 2.7K60 resolution and Max HyperSmooth video stabilization with low-distortion. Max Lens Mod packed with horizon lock when the camera is rotated a full 360o producing versatile creativity for film and television professionals, social media producers and weekend warriors, etc.

Compatible Mods collaborated with the Media Mod for HERO9

Black (Rs 8,400) and a removable foam windscreen also marketed with Display Mod (Rs 6,900); and Light Mod (Rs 4,700). Max Lens Mod will be marketed globally from October 2020. The Media Mod for HER09 Black and Display Mod will be obtained from September 16.
