

Microsoft Windows 11 Preview: Features And Specifications

Windows 11 is designed to bring you to a stage for the world's innovation. Microsoft just officially announced Windows 11, the next big version of its operating system. Microsoft has a simple design and user experience, it is now less cluttered and provide more space to their users. Windows 11 is available as a free upgrade over Windows 10.

Windows 11 comes with all new latest designs The Start menu has been placed at the centre along with the search bar right next to it contrary to what we have seen in previous Windows OSes it was previously placed on the left corner of the screen. New changes will remind you a bit of Apple. However, If users are not comfortable with a Start Menu, they can bring it back to the left by tapping on the Settings option.

Microsoft included a chat option on the taskbar with Microsoft Teams. Now the users can directly connect with the team through text, chat, voice or video with all of their personal contacts across Windows, Android or iOS.

Windows11 is a special treat for gamers. The new operating system is equipped with some of the latest gaming technology to provide a seamless gaming experience. The Windows 11 has "DirectX 12 Ultimate, which can enable breathtaking, amazing graphics at high frame cost; DirectStorage for quick load times and more detailed game worlds; and Auto HDR for a wider, more vivid range of colours for a truly amazing captivating visual experience.

Now the Microsoft 11 will support multiple monitors that would make it easier for users to work on virtual desktops and it will also support touch keyboards that have integrated GIFs from Tenor. Users can also use features like voice typing.

Windows 11 can be used for downloading apps just like Apple. Microsoft Store will soon get third party apps including Visual Studio, Canva, Disney+, Zoom and Adobe Creative Cloud, Microsoft has introduced Snap layouts, Snap Groups and Desktops to provide to let their users to multitask.

Now the users can discover Android apps in the Microsoft Store and download them through the Amazon Appstore. Windows 11 brings you closer to the latest news and information you care about quick access with Widgets a new personalized feed powered by AI and best-in-class browser performance from Microsoft Edge.
