

# Nokia 6.3 to launch in the market

Nokia is a well known Finnish multinational telecommunication, consumer electronics, and information technology company.

It is all set to launch its new model i.e Nokia 6.3 in the market and is expected to be much better than the previous smartphones of Nokia.

This phone runs on android v10 (Q). It has been powered by Octa-core (2.2 GHz, Dual-core, Kryo 470 + 1.8 GHz, Hexa Core, Kryo 470) processor. The device runs on the Qualcomm Snapdragon 730 Chipset with an LCD 6.39 inches screen size, and its screen resolution is 1080 x 2340 pixels. It has a Capacitive, Multi-touch touchscreen type with 4 GB RAM and 64 GB internal storage and it can be expanded up to 512 GB.

Currently, in today's scenario, every customer wants their phone to have good battery life and camera. And this phone has a battery life of 4200 mAh with an amazing camera quality of 13 MP Primary Camera and on the rear, there's a 24+12+2+2 MP camera. It also provides additional features like Auto Flash, Digital Zoom, Touch to focus, and Face detection. Apart from all these features this smartphone also provides several basic connectivity features such as GPS, Bluetooth, WiFi, VOLTE, etc.

The launch date of Nokia 6.3 is not officially announced but it is expected to be launched in August 2020 and the expected price in India is 14,999. Soon after launch, it will be available on Amazon, Flipkart. So hurry up and book your phones now to avoid delay.
