

Poco M3 is verified to be powered by the Qualcomm Snapdragon 662 SoC.

Poco M3 is all set to come today on November 24. Just ahead of the beginning, the company has teased some major specifications of the phone and has disclosed design details too. The display screen size, processor, and even the interior battery of the Poco M3 have been verified by the company. The Poco M3 is also set to give a triple camera setup at the back and amaze feature a water drop-style notch in advance. It is seen to sport a dual-tone rear panel.

The World Twitter account of Poco has declared a series of tweets confirming major specifications of the Poco M3 ahead of launch. The tweets verified that the Poco M3 will come with the feature of a 6.53-inch display screen and be powered by the Qualcomm Snapdragon 662 octa-core SoC. It is also affirming to pack a large 6,000mAh battery on board.

A video teaser discloses the design of the Poco M3 and it is similar to what has been revealed in the past. The Poco M3 has an amazing dual-palette pattern with a black rectangle in the upper section infused with the camera build and the company logo.

The camera module has three sensors sitting one under the other and the flash sits behind them. The logo strangely sits parallel to the camera module on the other side. The rest of the behind panel is seen to sport blue or black finishes completely. There is awaited to be a yellow color model as well.

The tweets revealed that the launch event will start at 8 pm GMT+8 (1.30 am IST, Wednesday) tomorrow. The event will be held virtually, with live stream information offered on

YouTube, Facebook, and Twitter. Past leaks affirm that the Poco M3 triple rear camera setup may involve a 48-megapixel primary camera. It is expected to offer dual speakers and come with 18W fast charging too.
