

# Realme Narzo 30 Is First Time On Sale Today At Flipkart

The all-new Realme Narzo 30 is all set to go on sale for the first time today. Today it is provided to the customers at a discount of Rs 500. The Narzo 30 is an upgraded version that includes things forwarded from Narzo 20 which was launched last year and now it brings some significant performance as well.

The all-new handset is powered by a MediaTek Helio G95 processor, which is among the good ones in the sub-Rs 20,000 segment. The Realme Narzo 30 is the best option for those who love playing games and are looking for a smartphone that can help them enjoy a smooth and responsive gaming experience, then they should say hello to the Realme Narzo 30 Pro 5G smartphone.

The handset packs a Full-HD+ display with a punch-hole design, along with three cameras on the back. The Narzo 30 was launched by the company alongside the Narzo 30 5G, which is the 5G counterpart of the former with nearly the same specifications.

Looking at the designs and looks of the Realme Narzo 30 and Narzo 30 5G both are the same as they share these looks. This smartphone can handle almost any large scale mobile gaming with ease, because of the Dimensity 800U 5G processor and this smartphone also supports Realme 5G+5G dual SIM dual standby, allowing you to use 5G on either of your SIM slots. The handset looks like a solid phone and that is why I can say that it is worth its price.

## **Price and Specifications of Realme Narzo 30**

The handset costs Rs 11,999 for the 4GB RAM and 64GB storage variant, but that is a discounted price that includes Rs. 500

of discount and that is likely valid for just today. The original cost of this handset's RAM and storage variant is Rs 12,499. There is also a 6GB RAM and 128GB storage variant, and it costs Rs 14,499. The smartphone bundles Racing Silver and Racing Blue as colourways. The silver colourway of Narzo 30 because of the unshining finish.

This handset carries a 5000mAh battery and that I think is one of its strong points and a 6.55-inch Full-HD+ display which makes the phones look a lot smoother. Smartphone's display has a punch-hole, as well, and that is something that you will see on phones that are priced higher than this one.
